FullStack web development (MERN)

PROJECTS

To-Do List Application with MERN Stack

- Developed a web application using Spring Boot for managing tasks.
- Implemented features for adding, editing, and marking tasks as complete.
- Utilized Express to handle user interactions and REST API to persist data.

Course Selling Project using MERN Stack
- **Users** can browse and search for courses based on criteria like category, price, and difficulty level. They can view detailed course information and purchase courses by providing payment details.
- The system allows users to track purchased courses, view progress, and access course materials.
- **Admin functionalities** include adding new courses, updating course details, managing course availability, and monitoring user enrollments and payments.
